

HIGH END SOLUTIONS for PREPRESS, PRINT and PACKAGING

PRESTODX

PRESTODX the all in one Spectrodensitometer for the pressroom

The PRESTO DX spectrodensitometer is the easy to use device for the press room. The high contrast, zero power display never goes off and shows the most recent measurement data even the next day.

You can configure the device to compare measurements to internal density and dot gain references or to colors in Lab.

The PRESTO DX offers a 4 jobs with up to 8 reference color definitions each. The closest color is detected automatically and the delta E is displayed.

*Ideal for
fixed color
printing*
